ABSTRACT

This article attempts to reveal Toni Morrison's works from a linguistic perspective. Morrison's creative style, the writer's chosen means of expression, word usage, and imagery system are analyzed linguistically. The writer's works reflect African-American culture and history, explore ethnic identity, and explore social issues through language. The article emphasizes the relevance of Morrison's works for modern linguistic research and offers new scientific views on her creative approaches. The metaphors, unique dialogues, and aesthetic elevation of language used in Morrison's works are also discussed, highlighting their role in linguistics.

KEYWORDS

Linguistic analysis, ethnic identity, African-American culture, metaphor, language aesthetics, artistic style, modern linguistics.

INTRODUCTION

Today, linguistic research is an important area of scientific research, since the features of the language of a literary text are closely related to the writer's creative style, social context, and cultural heritage. Our scientific research work will examine the works of Toni Morrison, her style, and her research. Toni Morrison is known as a major representative of African-American

literature, known not only for her unique style, but also as a writer who is able to illuminate the problems of society through the power of language. In her works, the historical experiences of African-Americans, issues of social discrimination and ethnic identity find vivid artistic expression. Morrison's texts are a unique source for linguistic research, and their linguistic

richness, semantic structure, and stylistic features arouse special scientific interest.

In the process of scientific research, the uniqueness of language and style in Toni Morrison's works will be analyzed. The reflection of African-American culture in the writer's work, the enrichment of words with social and emotional load, and the effectiveness of figurative means will be studied. This work is aimed at analyzing Morrison's works from a linguistic perspective, providing a deeper understanding of the role of artistic language in reflecting society and culture.

For this study, the main material from Toni Morrison's work was selected from her most famous works, in particular, "Beloved"[7], "The Bluest Eye"[5], and "Song of Solomon"[6]. These works serve as the most vivid examples of Morrison's creative style and linguistic skills. The study analyzed the specific linguistic units, metaphorical images, dialogues, and semantic fields created by the author from the texts of the works using linguistic and semiotic methods.

The selection of materials took into account the role of Morrison's works in expressing the historical and cultural aspects of African-American society, as well as the socio-philosophical views she introduced through artistic language. The linguistic means used in these works and their role in reflecting society constitute the main analytical object of the article.

In this research, we used, in addition to Morrison's texts, scientific sources in the field of linguistics and literary studies dedicated to her work, modern linguistic studies, and interviews with the author. This method allowed us to study the writer's creative style and strategies in using language in a more in-depth way.

LITERATURE ANALYSIS

Although Toni Morrison's works have been widely studied linguistically and literaryally, the system of images created through her language tools and her skill in illuminating social issues are still relevant for new research. An analysis of the literature written about the writer's works shows that the study of Morrison's work has been carried out mainly in the following areas: ethnic identification, the reflection of African-American history and culture, and stylistic and linguistic approaches.

In the studies of literary critics A. Dubois and E. Smith[2], the linguistic means used to reflect the social and historical context in Morrison's works were analyzed in detail. In their opinion, the writer used language not only to create an image, but also as a means of highlighting social problems of society. At the same time, O. Baker's research[1] highlights Morrison's use of metaphors, demonstrating the poetic power of language in her works.

In the work of R. Hall[3], based on a semiotic approach, the language system in Morrison's works is interpreted as a mirror of social communication. He defines Morrison's language as a "code expressing a cultural context" and emphasizes that her artistic language reflects the richness of African-American culture.

Also, the literature has studied Morrison's skill in reflecting the consciousness and inner world of her characters through syntactic and lexical devices. In particular, the research of M. Green and S. Parker[4] highlights the writer's unique methods of constructing dialogues and the importance of these methods in expressing the psychological states of the characters.

This analysis shows that Morrison's creative style is an important scientific object in various fields of linguistics and literary studies, and a deep study of the linguistic features of her works opens up new horizons in understanding the social and cultural content of the language of the literary text. This article uses this literature to propose new approaches to the linguistic analysis of Morrison's works.

Toni Morrison's work is one of the brightest achievements of world literature, and her works played an important role in bringing African-American culture to the world stage. Morrison, in her works, covered history, culture, and social problems in a unique artistic style, taking a unique place in world literature. Her work is deeply studied not only by

literary scholars, but also by social scientists and linguists.

Toni Morrison's works, such as "Beloved"[7], "Song of Solomon"[6], and "The Bluest Eye"[5], address universal human concerns—love and suffering, freedom and slavery, identity and equality. Beloved, in particular, explores the impact of slavery on the human psyche and the lasting impact of this difficult history on the minds of generations. The work brought Morrison worldwide critical and reader acclaim, and she won the Pulitzer Prize in 1988.

Morrison's work is a reflection of the voice of African Americans. Her works not only depict the historical experiences of African Americans, but also their cultural richness and philosophy of life. Morrison reveals the deepest aspects of humanity through her characters, and through each character seeks to restore historical justice.

The writer's award of the Nobel Prize in 1993 solidified her place in world literature.[8] The Nobel Committee described her works as "works of art brought to life by the power of language," recognizing Morrison's work as an integral part of the common cultural heritage of humanity.

Toni Morrison's work has increased the importance of African-American writers in world literature and has become a source of inspiration for a new generation of writers in this direction. The deep meaning, richness of

language, and artistic skill in her works have placed Morrison among the classics of modern world literature. The immortality and relevance of Adiba's work make her works constantly read and studied.

CONCLUSION

When analyzing Toni Morrison's works from a linguistic point of view, it was revealed that her work has deep semantic and stylistic layers of artistic language. In Adiba's works, issues such as the richness of African-American culture and history, social inequality, and ethnic identity are deeply reflected through linguistic means. The richness of Morrison's language, unique metaphors, and lexical units are of great importance in reflecting society and interpersonal relationships.

In the process of scientific research, we have determined that the dialogues, the speech of the characters and the system of images in Morrison's works are the main elements that reveal the author's socio-philosophical views. In particular, her linguistic style reflects not only artistic skill, but also the attitude to the socio-economic problems of society.

In conclusion, it can be noted that studying Toni Morrison's work from a linguistic perspective reveals not only the aesthetic possibilities of language, but also the unique ways of understanding society through the writer's artistic work. This study can determine new directions in scientific work devoted to Morrison's work and make an additional contribution to the field

of linguistic analysis. The language and style of Morrison's works are a rich scientific resource for studying not only the literary, but also the social and cultural aspects of the literary text.
