USE MODERN INTERACTIVE METHODS IN FRENCH TEACHING AND IMPLEMENT THEM IN PRACTICE

Turamurot B. Elmuratov
French Language Teacher At The Department Of French Language And Literature Karshi State University, Uzbekistan

ABSTRACT

At present, great attention is being paid to the use of various innovative and pedagogical technologies in teaching the French language in higher education in our country. This article is devoted to the methodology of teaching the French language. The use of modern pedagogical technologies in the educational process is also explained.

KEYWORDS

Pedagogical technologies, interactive methods, "Boomerang" method, French language, foreign language.

INTRODUCTION

Today, the ability to know foreign languages is becoming one of the integral parts of professional education. Due to the high rate of cooperation with foreign partners among specialists in various fields, there is a high demand for them to learn the language. The ability to use information technologies and modern teaching methods helps to quickly understand new materials. By combining different methods, the teacher is able to solve specific educational programs. In this regard, teachers and students should familiarize themselves with modern methods of teaching foreign languages. As a result, the ability to choose the most

effective methods to achieve one's goals is formed. The use of several methods of teaching and learning will give effective results. Teaching is carried out in small steps and is based on the existing knowledge system of the student. As time progresses, innovations in every field are increasing.

THE MAIN RESULTS AND FINDINGS

Nowadays, we understand very well that improving the quality and efficiency of education is the basis of our future development. The teacher should look at his subject creatively during the lesson. The teacher should organize the lesson using modern pedagogical technologies and methods. Currently, interest in the use of pedagogical and information technologies in the educational process is growing. Currently, there are several types of interactive methods, and the educational process is using these methods.

Pedagogical technology is a system of orderly actions that lead to pre-planned results and are necessary. There are many types of educational methods. Students need to master educational information, understand the topic, strengthen their knowledge of the topic through lectures, stories, explanations, video methods. The teacher should use several methods that serve to strengthen educational information, to understand, and to teach students to think about this topic. To increase students' vocabulary, to work with books, it is necessary to learn to work with tenses, phonetics, and exercises in French. In order to develop the French language in students, there are also "discussion", "circle", conversation, "pinboard", "business", brainstorming, presentation method, brainstorming method, "pitch saw" method, "Journey to the land of justice" method. , "Beehive" method, "Discussion-discussion" method, "Gallery" method,

"Match grain method", "Perception map" method, "Single circle" method and many other methods can be used in the course of the lesson. For example: Unité 11. Leçon 1. Ma saison préférée Objectif pédagogique de cette leçon: – pour connaître les saisons. Objectifs de développement: – permettre aux élèves de parler des saisons.

"Boomerang technology" can be used for a new topic. This technology allows students to work with texts during the lesson, remember the learned material, speak, freely express their thoughts, get a lot of information in a short time, and during the lesson by the teacher aimed at evaluating all students. Purpose: to control and assess how they respond to the texts and questions in the distributed materials through discussion and various questions.

The easiest languages to learn

If you want to learn an additional language, start with languages with easy grammar. In our article, we want to talk about languages that are easier to learn.

English language

English is the simplest. Also, you are familiar with the English language. Because you probably learned this language at school and institute, even if it was less. Or you have heard songs in this language.

French language

Many words in French sound similar to English. Also, this language is very popular and used in many places.

Spanish language

Learning Spanish is very easy. It is very similar to English and is spelled as it is pronounced.

Italian language

This language, like Spanish, is very simple and is familiar to many people because it comes from Latin languages.

In the educational system, not only the acquisition of broad knowledge and professional skills of students, the introduction of advanced methods of teaching using modern pedagogic and information and communication technologies, teaching foreign languages to the growing young generation, training of specialists who can freely communicate in languages and, on the basis of this, great opportunities are being created for them to widely use the achievements of world civilization and acquire enormous intellectual wealth.

Enabling students to own their grades. Application of technology. It can be used individually in the form of small groups and teams in practical training and discussion classes. Tools used in the lesson: handouts for students (ie, short texts on the topic, pictures, information).

The teacher addresses the students with questions, conducts an oral survey. Based on the answers to the questions, the total points of the groups are determined. The total points of the groups are determined. The total points collected by the groups are distributed equally among the members of the group. Interactive ("inter" - mutual "ast" - to act) means to act mutually, to talk with someone, to communicate. Interactive teaching methods are a special form of organization of knowledge and communicative activity in which learners are involved in the learning process, they have the opportunity to understand and think about what they know and think.

The "Boomerang" technology presented in the lesson gives students an opportunity to think, to form logic in them, as well as to develop their memory, ideas, thoughts, and arguments in written and oral forms. In addition to education, this method is educational in nature for students: - the ability to work with a team; - negotiable; - happiness; - skill; - respect other people's opinion; - activity; - creative approach to work; - interest in the effectiveness of one's activity; - gives an opportunity to form a number of qualities such as self-evaluation.

On the basis of teaching the young generation in foreign languages and improving the training of specialists who can speak these languages freely, the main goal is to create conditions for the achievements of world civilization, as well as the use of information resources of the world, the development of international cooperation and communication. For this reason, learning foreign languages has become the main requirement of today. At a time when information and communication technologies are rapidly developing in our country, globalization and competition in the world market are becoming more and more intense, educating an educated and intellectually developed generation, which is the most important value and decisive force in achieving the goals set in terms of democratic development, modernization and renewal, is an important factor.

CONCLUSION

In conclusion, it should be said that teaching a modern language is aimed at forming a more cultured person, who has the skills of self-analysis and systematization of new knowledge. Innovative methods are an integral part of the modernization of the entire system. This ensures that teachers can familiarize themselves with

the most advanced approaches and then integrate them and use them in their work to achieve significant growth in the education system.
